4x4 Post Accessories

**IMPORTANT** 4x4 Post Dimensions Explained **IMPORTANT**

Most lumber is sold in “nominal” (in name only) sizes such as 1x3, 2x4 and 4x4. But **these sizes are not the actual dimensions of the wood.** The reason for this is that when the 4x4 board is first rough sawn from the log, it is a true 4x4, but the drying process and planning of the board reduce it to the finished 3.5 x 3.5 size. All Erva 4x4 baffles accommodate this standard 3.5 x 3.5 size. This is the typical size found at most home centers and lumber yards.

Rough sawn true 4x4 posts are rare. Newer PVC posts also vary in size between 3.75 and 4 inches square. **Our 4X4ACT Baffle and T4X4ACT Ground Socket will accommodate true 4x4 posts.** Questions? Call 1-800-342-3782.

Shepherd Staff Accessories

- **RT5X**: 6/cs. 18” Staff extender. Fits RT3, RT3D, RT3SD, RT3DSD, RT3QSD Staffs.
- **RTWFR1X**: 6/cs. 8” Quick Connect™ hanger fits 1/2” square and 1/2” Round poles.

**Wrought Iron**

- **WIPH**: 4/cs. Clasps to vertical iron fence and porch spires from 7/16” to 3/4” square. 32” above rail hang point. Extends out 2-1/2” from baluster.
- **WIPHWD**: 4/cs. Same as WIPH but clasps to vertical spires from 1” to 1-1/2” Square. *Spires this thick are typically made of wood*

**Baluster Mount**

- **WIPH/WIPHWD** include specially formed 1/8” thick plates which provide “iron clad” holding power for extreme 30# capacity.
Note: All Erva deck hanger clamps open to a full 3-1/2” to accommodate the majority of deck hand rails. For larger applications see our SACLSX 5-5/8” clamp below.

The SACLSL “SL” for “spend less” is our least expensive clamp mount hanger. To keep costs down, there is no hanging label card. Instead, a simple UPC identifies the part. The clamp is also our smaller 2” opening version. If you need a low cost clamp mount deck hanger, this is your best choice.

The SACLSX Clamp has an opening large enough to fit over horizontal members from 2” to 5-5/8”. The clamp will not work on members thinner than 2” by design. Attaching the clamp to members under 2” increases leverage and stress on the threaded portion which may cause bending.

The following 11 pages contain complete packages. The selections were developed after many years of service to our independent brick and mortar specialty retailers and Independent Garden Centers (IGC) - hence the name IGC displays. The selections are here for your convenience. We are also willing and able to suggest and assemble starter displays based on your particular selling goals. Please contact us to discuss the possibilities.
